

**Greg Bowie (he/him)**  
Manufacturing Engineer at Invibio

***“A much more valuable way of learning is getting your hands stuck in [...] things won’t go as you plan, but as long you don’t get defeated by that and just learn from it, then go on and improve things. ”***

Greg’s **creativity** and **patience** helps him to create and test trauma plates, made from innovative materials, which are used to heal broken bones. He jointed engineering as an apprentice and quickly learnt how to be **resilient** when things don’t work first time!

Like Greg, I am:

**Creative**

**Patient**

**Resilient**
