

**Manjot Chana (he/him)**  
Senior System Integration Engineer at H2GO Power

***“I’ve always had a massive affinity for solving problems, for me life itself is a series of micro problems which need to be solved or optimized”***

An early **curiosity** about robots led Manjot to secure a degree apprenticeship in automotive engineering. Being **logical** and **organised** at work helps him to link different types of technology used to harvest and store hydrogen as a clean source of energy.

Like Manjot, I am:

**Curious**

**Logical**

**Organised**
