

Forces loans box

Pupils might use this box to work scientifically by: comparing how different things move and grouping them; raising questions and carrying out tests to find out how far things move on different surfaces and gathering and recording data to find answers their questions;

Sturdy ramp kit for use in forces investigations. Includes 2 reversible slopes which feature sandpaper, carpet underlay, plain wood and a foam surface. Also includes a stand with five height settings and a ruler printed on the side. The different height settings ensure that the gradient of the ramp can be altered to a variety of angles.

Pack of racing cars and other vehicles ideal for use in forces experiments.
