

CLIMATE CHANGE: IT'S IN OUR HANDS

GAME RULES.

The aim of the game:

Keep the global temperature rise to below 1.5 degrees. If you're below 1.5 degrees after the 4 rounds well done, you have saved the planet!

BOARD SET UP:

Do the following steps one at a time before moving on to the next.

- Place a token at the bottom of the thermometer where it says 'today'
- Place a token in the box above where it says 'Round 1: Now'.
- Lay out the event cards with their numbers showing.

PLAYER SET UP:

- Each player (or team) should now take a token, choose where you want to live and place the token on the map. You can live in the same place as someone else.
- Each player (or team) picks up the place card for where you have chosen to live.
- Take turns to read out your cards to all the players.
- Hand out 2 money tokens to each player (or team).

CLIMATE CHANGE: IT'S IN OUR HANDS

PLAYING THE GAME:

There are 4 rounds, with 8 steps per round.

STEPS:

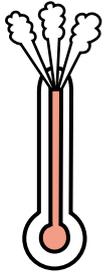

1. All players (or teams) get 2 money tokens and chose how to spend them on the actions available. You can:
 - o Buy something by yourself
 - o Chip-in with others for something more expensive
 - o Pay towards an action and finish paying for it in a later round*

Each action can be bought more than once in the same round.

*If there aren't enough tokens to fully buy an action in one round, the money tokens will remain on the board and can be added to in later rounds (see step 7).

2. Move the token on the thermometer up 20 notches – the planet will get hotter unless we take actions!
3. Add up the 'impact scores' of all players' chosen actions. See how your chosen actions affect the temperature by moving the token on the thermometer. (Remember to only add up the ones that are fully paid for).

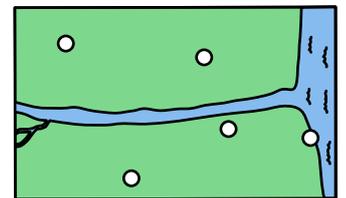

4. An event occurs! Roll the dice to see which event takes place. Turn over and read out the card that matches the number on the dice.

* Where the token is on the thermometer shows you how many 'event' dice rolls there are for each round.

5. See how the event affects different places on the map. What happens where you live?

6. Move the round token to the next round box.

7. Clear money tokens off the board unless an action is partly paid for or if the action lasts for 2 rounds, in which case leave them there for another round.

8. Hand out more money tokens to each player, but remember to check the event cards, as some events may mean you get less money

Repeat steps 1-8 for rounds 2-4.
